## Foreign maturity exam

Candidates holding a Secondary School Leaving Certificate obtained abroad are admitted based on the number of points obtained during the entrance exam. The entrance exam covers three subjects: biology, chemistry and physics. The two highest results from the subjects mentioned above will be taken into account for qualification. The exam is considered positive if the candidate obtains a minimum score of 30% in both subjects. The third subject is a foreign language with a score of 100% - it's the language of the country where the candidate obtained the Secondary School Leaving Certificate. The qualification result is the average of the exam result and the foreign language score. To be allowed to join the exam the candidate has to have grades on his/her Secondary School Leaving Certificate from 3 subjects: biology, chemistry and mathematics or physics.

Please select the following three exams:

Biology Exam (Foreign Matura) - medicine ang.

Chemistry Exam (Foreign Matura) - medicine ang.

Physics Exam (Foreign Matura) - medicine ang.

Remember to set priorities for your payments: [Set priorities](#)

On this page you can view a summary of financial operations on your IRK account. If the system has been configured to support payments in more than one currency, your payments will be divided into separate tables in regard to these currencies. Your account deposits have positive value in the *Amount* column, while charges have a negative value. If an application has not been paid on time or a refund has been made, the payment will be displayed with grey background and its amount will not be calculated into the sum that is displayed above the table.
